April Membership Spotlight

Adam Thomas
Electrical Engineering

The Engineers' Club of St. Louis has begun recognizing one member a month who has made a positive impact on the Club and its members. We would like to recognize Adam Thomas as the April member spotlight.

Adam Thomas was born and raised in St. Louis and graduated from the Missouri University of Missouri Science & Technology in 2019 with an Electrical Engineering degree. Adam is now working as a Substation Engineer for Burns & McDonnell. When Adam isn't working hard at Burns & McDonnell, he is cheering on the Cardinals and the Blues or spending his time as the VP Membership Toastmasters for Burns & McToasters Chapter and volunteering at the St. Anselm Parish Youth Group. Mr. Thomas also enjoys snow skiing, golfing, playing pickleball and softball.

When asking Adam Thomas why he became an engineer, he answered, "I am a 4th generation engineer. My parents are both engineers so family dinners were technical on how things worked and why. I grew up working for my grandfather who was the maintenance man for a large apartment complex. Becoming an engineer was the most logical choice and almost a rite of passage." Mr. Thomas has been an Engineers' Club member since 2019 and jumped right into The Club committees and activities. Adam currently serves on the Young Engineers' Committee and is now the Engineers' Club Golf League Treasurer. When asked what the Engineers' Club means to him, Mr. Thomas explained, "The Engineers' Club helps bring together and grow the engineering community in St. Louis. I really like how it supports small business and entrepreneurs."
